DIY Printing: Sticker Cards

Playtest edition v0.4.0 | Wicked Combo

Print your own cards at home with sticker sheets and blank poker cards. The sticker file is already on the itch page, alongside the cards, rulebook, and arena maps.

What to buy

- Apostrophe Games blank stickers for playing cards - poker size, for laser or inkjet printers, 216 labels on 24 sheets. One pack prints the set several times over.
- Apostrophe Games Build Your Own Board Game Kit - 72 blank poker-size cards to stick the labels on. One kit covers the 45 sticker cards.
- A color printer, laser or inkjet.

How to print

1. Download Sticker sheets (v0.4.0) from the itch page.

2. Print at 100% / actual size. Test page 1 first for alignment.

3. Peel each label and stick it centered on a blank poker card, then press flat.

4. Print the arena maps separately on regular paper or cardstock: small map for 2 to 4 players, large map for 5 to 6 players.

About the files

Sticker sheets (v0.4.0): 5 pages, 45 cards, 9-up, US Letter.

Note: the sticker sheets hold 45 cards, not 46, because Wheel is left off the sticker sheets.
